-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

In light of the newly founded art (U.S. Patent No. 6,101,724), the allowable subject matter of claims 4 and 17-19 as indicated in the previous Office action (mailed on 5-27-2005) has been withdrawn. Any inconvenience to the Applicant is regretted.

Claims Rejection - 35 U.S.C. 103(a)

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 5-9, 14-16, 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schaub (U.S. Patent No. 4,908,947) in view of Bolling (U.S. Patent No. 2,456,858).

Schaub discloses an apparatus comprising a first folding knife (see Fig.1), a second folding knife (see column 2, lines 7-12); wherein the first folding knife includes a first attachment device (8); wherein the second folding knife includes a second attachment device (11); wherein the first attachment device (8) and the second attachment device (11) can be attached to each other to attach the first folding knife to the second folding knife; and wherein the first attachment device (8) and the second

attachment device (11) can be detached to each other to detach the first folding knife from the second folding knife substantially as claimed except for the shape of the two attachment devices.

Specifically, Schaub's first attachment device (8) comprises a first plate (15) having a groove-like recess (8), and the second attachment device (11) comprises a dovetail-shaped connecting element (11) slidably received in the groove-like recess for attaching the two attachment devices (8,11) and their respective knives together.

However, it is notoriously old and well known in the art to attach two elements together by providing one element with an opening and the other element with a protrusion so that the protrusion can be inserted into the opening for attaching the two elements together as evidenced by Bolling. Bolling also shows the first attachment device comprising a first plate (6) having an opening (7/8), and a third plate (5) having an opening (7/8) substantially aligned with (see Fig.5) the opening (7/8) of the first plate (6); and the second attachment device comprising a second plate (17) having a protrusion (36,38) attached thereto to be inserted into the opening (7/8) of either the first plate (6) or the third plate (5). Bolling also shows two stops (15) protruding into (see Figs. 3 and 6) the opening (7) of the third plate (5) as claimed.

In view of this fact, it would have been obvious to one skilled in the art to modify Schaub by substituting Bolling's attachment devices for those of Schaub's. The modification is obvious since it would only involve substituting one known type of attachment device for another for attaching two elements together.

3. Claims 4 and 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schaub (U.S. Patent No. 4,908,947) and Bolling (U.S. Patent No. 2,456,858) as applied to claims 1 and 14-16 above, and further in view of Halligan (U.S. Patent No. 6,101,724).

Schaub's modular knife as modified above shows all the claimed structure except the plate does not have a portion that flexes to keep the blade in an open position.

Halligan shows a knife comprising a plate (22) having a portion (82) that flexes for locking a knife blade (30) in an open position (see Fig.1).

It would have been obvious to one skilled in the art to further modify Schabu by providing the third plate with a flexible portion to facilitate locking the blade in an open position during use as taught by Halligan.

4. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schaub (U.S. Patent No. 4,908,947) and Bolling (U.S. Patent No. 2,456,858) as applied to claim 1 above, and further in view of Cheng (U.S. Patent No. Des. 419,851).

Schaub's modular knife as modified above shows all the claimed structure except for the clip.

Cheng shows a knife comprising a clip (see Fig.6).

It would have been obvious to one skilled in the art to further modify Schaub by providing the modular knife with a clip to facilitate hanging when not in use as taught by Cheng.

Indication of Allowable Subject Matter

Claims 12 and 13 are allowed.
